ABOUT ME

Certainly! Based on your provided information, here is a professional English profile for Dr. Sahar Royanian:

Professional Profile – Dr. Sahar Royanian

Dr. Sahar Royanian holds a Ph.D. in Electronic Engineering and possesses a Grade 1 Professional Engineering License from the Iranian Construction Engineering Organization. She serves as the Vice Chair of the Board and Executive Director at Naban Smart Engineering Company. With over 13 years of specialized experience in smart building automation, Dr. Royanian combines deep technical expertise with strategic insight in internal management, marketing, sales, and the execution and delivery of intelligent building projects.

For more than a decade, Dr. Royanian has taught specialized electrical and electronic engineering courses at universities across Mazandaran Province. She has also been actively involved in education and sales within the field of robotics nationwide and currently serves as an instructor at Naban Technical and Vocational Training Center. Additionally, she has over 11 years of extensive experience in the design, supervision, and implementation of electrical installations under the auspices of the Construction Engineering Organization. Her efforts in establishing a cohesive network for the sales of electronic and low-voltage equipment have further distinguished her in the industry.

Naban Smart Engineering currently operates with 15 official representatives across the country.

Dr. Royanian’s combination of technical proficiency, managerial experience, professional approach, transparency in collaborations, and commitment to long-term partnerships makes her a reliable choice for international suppliers seeking collaboration in the Iranian market.
